

# Marylanders - Get Ready to Embark on Your Biotech Industry Journey

## Biotech Boot Camp is Back!

**December 12-22, 2022 & January 9-20, 2023, evenings**

Montgomery College is pleased to offer another free-of-cost, four-week (64 hours) biotechnology (biotech) boot camp from December 12-22, 2022 & January 9-20, 2023, 5:00 p.m. to 9:00 p.m. on the Germantown Campus. The initiative is a collaborative effort between WorkSource Montgomery and Montgomery College and is sponsored by a State of Maryland EARN grant. MC Biotech Boot Camp is ideal for those who seek a new career, change of career, or those who are unemployed. The industry-reviewed lecture and hands-on laboratory workshop provide intensive skill-set training for entry-level biomanufacturing jobs.

The Life Sciences industry is heavily regulated given that products are developed to enter the human body. Working in this industry requires keen attention to detail and preciseness, methodical practices, carefully following directions and adherence to safety protocols (including proper gowning in laboratories), along with exceptional observation, and documentation skills.

For consideration in MC Biotech Boot Camp, please submit a completed Pre-registration form. **Act fast - Seats are limited.** A Zoom meeting link will be sent to selected candidates after evaluating the completed registration form. After the "successful" completion of the Boot Camp training, the participants will undergo resume writing/interview preparation workshop to make them ready to face the biotech employers. Successful bootcamp graduates will have their resumes presented to local biotech companies for review and possible interview opportunities. Participating area biotech companies include Millipore Sigma, AstraZeneca, Quality Biological and ORIGene.

Please see the self-screening presentation to assess if MC Biotech Boot Camp is right for you.
